

DEVELOPED BY UK DENTISTS

“Tooth whitening is the practice of dentistry and can only safely and legally be offered by registered dental professionals.”  
- General Dental Council

**Why LUMIWHITE Teeth Whitening is the number one choice for many dentists & patients:**

- Whiter teeth guaranteed
- Luxurious teeth whitening experience
- Contains Potassium Nitrate to manage sensitivity
- Contains Sodium Fluoride to promote remineralisation
- High water content to prevent tooth dehydration
- pH neutral gels to prevent demineralisation
- Viscous gels to ensure the whitening gel does not run off the whitening trays

ASK YOUR DENTIST ABOUT

LUMIWHITE

DEVELOPED BY UK DENTISTS

### HOW DOES IT WORK?

LUMIWHITE Teeth Whitening gels contain a special whitening agent called Carbamide Peroxide.

When it's applied to your teeth, the whitening agent breaks down to release Hydrogen Peroxide and Urea over several hours. Hydrogen Peroxide whitens the teeth by breaking down the large organic molecules that cause staining of the teeth.

LUMIWHITE Teeth Whitening is completely safe to use under the supervision of your dentist.

### HOW WHITE WILL MY TEETH BECOME & HOW LONG WILL IT TAKE?

Whiter teeth are guaranteed!

LUMIWHITE Teeth Whitening has the potential to whiten your teeth by up to 16 tooth shades.

Your teeth will become brighter and whiter after just a couple of days of using LUMIWHITE Teeth Whitening. For optimal results, most patients will whiten their teeth for at least 3 weeks. In some cases prolonged whitening may be required, though your dentist will be able to advise you regarding this.

### HOW LONG DOES IT LAST?

LUMIWHITE Teeth Whitening has been designed so the results can be permanent. We understand how important it is for you to maintain your lovely new smile and therefore recommend discussing an appropriate whitening top-up regimen with your dentist to help you keep your teeth the way you like them.

**BEAUTIFUL RESULTS WITH LUMIWHITE**
